2213	Yellow passata	tin	2550 g	6×	36 months

**MINIMUM ORDER QUANTITY:** mixed 1× 20ft container

**SAN MARZANO TOMATO** is mainly cultivated in the Agro Nocerino – Sarnese area, and it is known and appreciated throughout the world for its characteristics, which are exalted by its transformation into peeled tomato. It is cultivated as the vineyard and it is harvested three or four times a year – from July until September. Its taste is typically bitter – sweet, and its colour is bright red, the shape of its berry is extended, with longitudinal parallel depressions, with poor presence of seeds and placental fibres; moreover its skin, when completely ripe, can be easily removed. These features, let the San Marzano tomato be unique, both in the fresh status and in the transformed one. It is a very delicate tomato, that should be carefully handled. After its harvest, the tomato is washed and canned, with no additives neither preservatives.
